nomadwheelchairs.com

As a design award winning company, Nomad is committed to providing exciting, innovative solutions to mobility products. Our latest product, the One Arm Drive, is no exception.

Nomad's One Arm Drive (OAD) allows you to propel and manoeuvre a wheelchair with the use of one arm. Our commitment to practical and beautiful design means this One Arm Drive has many unique features that offer significant benefits to the user:

- Currently the only One Arm Drive that uses *Spinergy* wheels – the best and coolest wheelchair wheels on the planet
- Quick Release Wheels – making it easier to transfer your chair
- 0,3,6,9 degrees of camber available – great for sports
- Very lightweight design includes 2 universal joints, which relieve stress throughout the unit and makes the drive stronger and more reliable
- Innovative direct drive design gives much less play between pushrims – makes it more efficient to push, reducing stress on your muscles and joints
- Nomad's famous commitment to design means it looks great – particularly with *Spinergy* wheels
- It can be retrofit to nearly all wheelchairs
- Why compromise?
